On January 11, 2019, the Company and Access National Corporation ("Access") jointly announced the receipt of regulatory approval from the Federal Reserve Bank of Richmond and from the Virginia State Corporation Commission to move forward with the proposed merger of Access into the Company (the "Pending Access Merger"). Further, on January 15, 2019, the Company and Access jointly announced that, at separate special meetings, the shareholders of both the Company and Access approved the Pending Access Merger. ## NET INTEREST INCOME

For the fourth quarter of 2018, net interest income was \$109.1 million, an increase of \$3.1 million from the third quarter of 2018. Net interest income (FTE)(1) was \$111.4 million in the fourth quarter of 2018, an increase of \$3.4 million from the third quarter of 2018. The increases in both net interest income and net interest income (FTE) were primarily driven by loan growth during the quarter ended December 31, 2018. The fourth quarter net interest margin decreased 7 basis points to 3.62% from 3.69% in the previous quarter, while the net interest margin (FTE)(1) decreased 6 basis points to 3.70% from 3.76% during the same periods. The decreases in the net interest margin and net interest margin (FTE) were principally due to an approximately 15 basis point increase in the cost of funds, partially offset by an approximately 9 basis point increase in the yield on earnings assets.

The Company’s net interest margin (FTE) includes the impact of acquisition accounting fair value adjustments. During the fourth quarter of 2018, net accretion related to acquisition accounting decreased \$182,000 from the prior quarter to \$3.8 million for the quarter ended December 31, 2018. The third and fourth quarters of 2018 and the remaining estimated net accretion impact are reflected in the following table (dollars in thousands):

	Loan Accretion	Deposit Accretion	Borrowings Amortization	Total
For the quarter ended September 30, 2018	3,496	592	(143)	\$ 3,945
For the quarter ended December 31, 2018	3,479	445	(161)	3,763
For the year ended December 31, 2018	17,145	2,553	(506)	19,192
For the years ending (estimated)(2)				
2019	10,538	1,170	(660)	11,048
2020	8,130	284	(734)	7,680

2022	4,984	21	(827)	4,178
2023	2,996	—	(850)	2,146
Thereafter	10,550	—	(11,633)	(1,083)

(1) For the reconciliation of these non-GAAP financial measures, see Alternative Performance Measures (non-GAAP) section of Key Financial Results.

(2) Estimated net accretion only includes accretion for the previously completed acquisitions. The accretion effects of the Pending Access Merger are not included in the information above.

## ASSET QUALITY/LOAN LOSS PROVISION

### Overview

During the fourth quarter of 2018, the Company experienced decreases in nonperforming asset (“NPA”) balances from the prior quarter, primarily due to an increase in charge-offs related to two credit relationships composed of construction and land development loans. Past due loan levels as a percentage of total loans held for investment at December 31, 2018 were higher than past due loan levels at September 30, 2018 and December 31, 2017. Charge-off levels increased from the third quarter of 2018 and were primarily related to the consumer loan portfolio; as a result, the provision for loan losses increased from the third quarter of 2018.

All nonaccrual and past due loan metrics discussed below exclude purchased credit impaired (“PCI”) loans totaling \$90.2 million (net of fair value mark of \$23.3 million) at December 31, 2018.

#### Nonperforming Assets

At December 31, 2018, NPAs totaled \$33.7 million, a decline of \$1.2 million, or 3.5%, from September 30, 2018 and an increase of \$6.7 million, or 24.7%, from December 31, 2017. NPAs as a percentage of total outstanding loans at December 31, 2018 were 0.35%, a decrease of 2 basis points from 0.37% at September 30, 2018 and a decline of 3 basis points from 0.38% at December 31, 2017. As the Company’s NPAs have been at or near historic lows over the last several quarters, certain changes from quarter to quarter might stand out in comparison to one another but do not have a significant impact on the Company’s overall asset quality position.

The following table shows a summary of nonperforming asset balances at the quarter ended (dollars in thousands):

	<b>December 31, 2018</b>	<b>September 30, 2018</b>	<b>June 30, 2018</b>	<b>March 31, 2018</b>	<b>December 31, 2017</b>

#### Past Due Loans

Past due loans still accruing interest totaled \$61.9 million, or 0.64% of total loans, at December 31, 2018 compared to \$46.6 million, or 0.49% of total loans, at September 30, 2018 and \$27.8 million, or 0.39% of total loans, at December 31, 2017. Of the total past due loans still accruing interest, \$8.9 million, or 0.09% of total loans, were loans past due 90 days or more at December 31, 2018, compared to \$9.5 million, or 0.10% of total loans, at September 30, 2018 and \$3.5 million, or 0.05% of total loans, at December 31, 2017. The increase in past due loans was primarily driven by a seasonal increase related to residential 1-4 family loans that were 30 days past due as of year-end of which the majority subsequently became current.

#### *Net Charge-offs*

For the fourth quarter of 2018, net charge-offs were \$5.0 million, or 0.21% of total average loans on an annualized basis, compared to \$3.2 million, or 0.13%, for the prior quarter and \$2.7 million, or 0.15%, for the same quarter last year. The majority of net charge-offs in the fourth quarter of 2018 were related to consumer loans. For the year ended December 31, 2018, net charge-offs were \$11.1 million, or 0.12% of total average loans, compared to \$10.1 million, or 0.15%, for the year ended 2017.

#### *Provision for Loan Losses*

The provision for loan losses for the fourth quarter of 2018 was \$4.8 million, an increase of \$1.7 million compared to the previous quarter and an increase of \$1.0 million compared to the same quarter in 2017. The increase in provision for loan losses from the third quarter of 2018 was primarily driven by loan growth and higher levels of net charge-offs in the fourth quarter of 2018.

#### *Allowance for Loan Losses ("ALL")*

The ALL decreased \$249,000 from September 30, 2018 to \$41.0 million at December 31, 2018 primarily due to a decrease in historical loss rates. The ALL as a percentage of the total loan portfolio was 0.42% at December 31, 2018, 0.44% at September 30, 2018, and 0.54% at December 31, 2017. The year-over-year decline in the allowance ratio was primarily attributable to the acquisition of Xenith Bankshares, Inc. ("Xenith") on January 1, 2018. In acquisition accounting, there is no carryover of previously established allowance for loan losses.

The ratio of the ALL to nonaccrual loans was 152.3% at December 31, 2018, compared to 146.9% at September 30, 2018 and 175.7% at December 31, 2017. The current level of the allowance for loan losses reflects specific reserves related to nonperforming loans, current risk ratings on loans, net charge-off activity, loan growth, delinquency trends, and other credit risk factors that the Company considers important in assessing the adequacy of the allowance for loan losses.

### **NONINTEREST INCOME**

Noninterest income increased \$3.6 million to \$23.5 million for the quarter ended December 31, 2018 from \$19.9 million in the prior quarter. The increase in noninterest income was primarily driven by life insurance proceeds of approximately \$976,000, an increase in customer-related fee income of \$222,000 due to higher overdraft fees and fiduciary and asset management fees, an increase in interest rate swap fees of \$814,000 due to an increase in transaction volume, and \$933,000 adjustment made in the third quarter to reduce the previously recorded gain from the sale of Shore Premier.

### **NONINTEREST EXPENSE**

Noninterest expense decreased \$1.8 million to \$74.5 million for the quarter ended December 31, 2018 from \$76.3 million in the prior quarter. Excluding merger-related costs of \$2.3 million and \$1.4 million in the fourth and third quarters of 2018, respectively, operating noninterest expense<sup>(1)</sup> decreased \$2.7 million, or 3.6%, to \$72.2 million when compared to the third quarter of 2018. The decrease in operating noninterest expense included a decline in marketing and advertising expense of \$898,000 due to the timing of marketing campaigns and digital marketing related expenses. Salaries and benefits expenses declined \$698,000, primarily due to decreases in incentive compensation and benefit costs. Professional services declined \$692,000 primarily due to a decrease in consulting fees. Additionally, operating noninterest expense declined due to lower amortization of intangibles of \$536,000 and a decline in branch closure costs of approximately \$475,000 compared to the third quarter of 2018.

Partially offsetting these declines, other real estate owned ("OREO") and credit-related expenses increased \$574,000 primarily due to losses on sales of property in the fourth quarter of 2018 compared to gains recognized in the third quarter of 2018.

*(1) For a reconciliation of this non-GAAP financial measure, see Alternative Performance Measures (non-GAAP) section of the Key Financial Results.*

## INCOME TAXES

The effective tax rate for the three months ended December 31, 2018 was 16.5% compared to 15.9% for the three months ended September 30, 2018. The increase in the effective tax rate was primarily due to an increase in non-deductible merger expenses related to the Pending Access Merger.

(1) These are non-GAAP financial measures. Net interest income (FTE), which is used in computing net interest margin (FTE) and efficiency ratio (FTE), provides valuable additional insight into the net interest margin and the efficiency ratio by adjusting for differences in tax treatment of interest income sources. The entire FTE adjustment is attributable to interest income on earning assets, which is used in computing yield on earning assets. Interest expense and the related cost of interest-bearing liabilities and cost of funds ratios are not affected by the FTE components.

(2) These are non-GAAP financial measures. Tangible common equity is used in the calculation of certain profitability, capital, and per share ratios. The Company believes tangible common equity and the related ratios are meaningful measures of capital adequacy because they provide a meaningful base for period-to-period and company-to-company comparisons, which the Company believes will assist investors in assessing the capital of the Company and its ability to absorb potential losses.

(3) These are non-GAAP financial measures. The Company believes that ROTCE is a meaningful supplement to GAAP financial measures and useful to investors because it measures the performance of a business consistently across time without regard to whether components of the business were acquired or developed internally.

In prior periods, the Company has not added amortization of intangibles, tax effected to net income (GAAP) and operating net income (non-GAAP) when calculating ROTCE and operating ROTCE, respectively. The Company has adjusted its presentation for all periods in this release.

(4) These are non-GAAP financial measures. Operating measures exclude merger-related costs unrelated to the Company's normal operations. The Company believes these measures are useful to investors as they exclude certain costs resulting from acquisition activity and allow investors to more clearly see the combined economic results of the organization's operations.

(5) All ratios at December 31, 2018 are estimates and subject to change pending the Company's filing of its FR Y9-C. All other periods are presented as filed.
