ATLANTIC UNION BANKSHARES REPORTS THIRD QUARTER FINANCIAL RESULTS

Richmond, Va., October 20, 2022 – Atlantic Union Bankshares Corporation (the "Company" or "Atlantic Union") (Nasdaq: AUB) reported net income available to common shareholders of \$55.1 million and basic and diluted earnings per common share of \$0.74 for the third quarter ended September 30, 2022. Adjusted operating earnings available to common shareholders⁽¹⁾ were \$55.1 million, diluted adjusted operating earnings per common share⁽¹⁾ were \$0.74, and pre-tax pre-provision adjusted operating earnings available to common shareholders⁽¹⁾ were \$73.4 million for the third quarter ended September 30, 2022.

"We believe the third quarter financial results show that Atlantic Union Bankshares is delivering on what we said we would do - with upper single digit annualized loan growth, double digit deposit growth, strong credit quality, an expanding net interest margin and positive operating leverage," said John C. Asbury, president and chief executive officer of Atlantic Union. "We continue to see resiliency and positive market dynamics in our footprint, which combined with our asset sensitivity, gives us confidence in our ability to achieve our top tier financial targets."

"Operating under the mantra of soundness, profitability and growth – in that order of priority - Atlantic Union remains committed to generating sustainable, profitable growth and building long term value for our shareholders."

NET INTEREST INCOME

For the third quarter of 2022, net interest income was \$150.7 million, an increase of \$11.9 million from \$138.8 million for the second quarter of 2022. Net interest income (FTE)⁽¹⁾ was \$154.6 million in the third quarter of 2022, an increase of \$12.2 million from the second quarter of 2022. The increases in net interest income and net interest income (FTE)⁽¹⁾ were primarily driven by increases in loan yields on the Company's variable rate loans due to higher market interest rates, higher interest income due to average loan growth from the prior quarter, and the additional day count in the third quarter, compared to the second quarter. These increases were partially offset by decreases in Paycheck Protection Program ("PPP)" and fair value accretion interest income and increases in deposit and borrowing costs as a result of increases in short-term market rates and average deposit growth from the prior quarter. The third quarter net interest margin increased 19 basis points from the prior quarter to 3.34% at September 30, 2022, and the net interest margin (FTE)⁽¹⁾ increased 19 basis points during the same period to 3.43%. Earning asset yields increased by 42 basis points in the third quarter of 2022 compared to the second quarter due to the impact of rising market interest rates on loans and investment securities yields. The cost of funds increased from the prior quarter by 23 basis points at September 30, 2022, driven by higher deposit and borrowing costs as noted above.

The Company's net interest margin (FTE)⁽¹⁾ includes the impact of acquisition accounting fair value adjustments. Net accretion related to acquisition accounting was \$1.1 million for the quarter ended September 30, 2022, representing a decrease of \$1.6 million from the prior quarter. The first, second, and third quarters of 2022 and the remaining estimated net accretion impact are reflected in the following table (dollars in thousands):

ASSET QUALITY

Overview

During the third quarter of 2022, nonperforming assets ("NPAs") as a percentage of loans remained low at 0.21% at September 30, 2022. Accruing past due loan levels as a percentage of total loans held for investment at September 30, 2022 totaled 21 basis points, which was a 6 basis point increase from June 30, 2022, and a 9 basis point decrease from September 30, 2021. Net charge-off levels remained low at 0.02% of total average loans (annualized) for the third quarter of 2022. The allowance for credit losses ("ACL") totaled \$119.0 million at September 30, 2022, a \$5.8 million increase from the prior quarter.

Nonperforming Assets

At September 30, 2022, NPAs totaled \$28.6 million, a decrease of \$2.5 million from June 30, 2022. The following table shows a summary of NPA balances at the quarter ended (dollars in thousands):

	September 30, 2022		•	June 30, 2022		March 31, 2022		December 31, 2021		ptember 30, 2021

Past Due Loans

Past due loans still accruing interest totaled \$29.0 million or 0.21% of total loans held for investment at September 30, 2022, compared to \$20.4 million or 0.15% of total loans held for investment at June 30, 2022, and \$38.8 million or 0.30% of total loans held for investment at September 30, 2021. The increase in past due loan levels in the third quarter of 2022 as compared to the second quarter of 2022 was primarily due to increases in past due credit relationships within the commercial real estate – owner occupied and commercial and industrial portfolios. Of the total past due loans still accruing interest, \$7.4 million or 0.05% of total loans held for investment were loans past due 90 days or more at September 30, 2022, compared to \$4.6 million or 0.03% of total loans held for investment at June 30, 2022, and \$11.0 million or 0.08% of total loans held for investment at September 30, 2021.

Allowance for Credit Losses

At September 30, 2022, the ACL was \$119.0 million and included an allowance for loan and lease losses ("ALLL") of \$108.0 million and a reserve for unfunded commitments ("RUC") of \$11.0 million. The ACL at September 30, 2022 increased \$5.8 million from June 30, 2022, primarily due to increased uncertainty in the macroeconomic outlook and the impact of loan growth in the third quarter of 2022.

The ACL as a percentage of total loans increased to 0.86% at September 30, 2022, compared to 0.83% at June 30, 2022. The ALLL as a percentage of total loans was 0.78% at September 30, 2022, compared to 0.76% at June 30, 2022.

Net Charge-offs

Net charge-offs were \$587,000 or 0.02% of total average loans on an annualized basis for the quarter ended September 30, 2022, compared to \$939,000 or 0.03% (annualized) for the second quarter of 2022, and \$113,000 or less than 0.01% (annualized) for the third quarter of 2021. On a year-to-date basis through September 30, 2022, net charge-offs totaled \$1.5 million or 0.02% of total average loans (annualized).

Provision for Credit Losses

For the quarter ended September 30, 2022, the Company recorded a provision for credit losses of \$6.4 million, compared to a provision for credit losses of \$3.6 million in the previous quarter, and a negative provision for credit losses of \$18.8 million recorded during the same quarter in 2021. The provision for credit losses for the third quarter of 2022 reflected a provision of \$4.4 million for loan and lease losses and a \$2.0 million reserve for unfunded commitments.

NONINTEREST INCOME

Noninterest income decreased \$12.7 million to \$25.6 million for the quarter ended September 30, 2022 from \$38.3 million in the prior quarter, primarily due to the impact of the sale of Dixon, Hubard, Feinour & Brown, Inc. ("DHFB"), as the prior quarter included a \$9.1 million pre-tax gain on the transaction within other operating income. In addition, the current quarter's fiduciary and asset management fees decreased \$2.8 million from the prior quarter due to a decrease in assets under management primarily driven by the DHFB sale. Other decreases from the prior quarter include a \$1.3 million decrease in service charges on deposit accounts, reflective of the changes to the Company's overdraft policy, a \$810,000 decrease in mortgage banking income due to a decline in mortgage origination volumes and lower gain on sales margins, and a \$550,000 reduction in loan related interest rate swap fee income driven by a decrease in average transaction swap fees. These noninterest income category decreases were partially offset by increases of \$819,000 primarily related to syndication, foreign exchange, and other capital market transaction fees, included in other operating income, an increase of \$729,000 in bank owned life insurance income due to mortality benefits, and an increase of \$193,000 in interchange fees.

NONINTEREST EXPENSE

Noninterest expense increased to \$99.9 million for the quarter ended September 30, 2022 from \$98.8 million in the prior quarter, primarily driven by a \$1.3 million increase in salaries and benefits expense due primarily to elevated new hire recruiting expenses and lower deferred loan origination costs resulting from changes in loan originations production mix from the prior quarter. In addition, other expenses increased from the prior quarter by \$1.1 million primarily driven by OREO gains of \$631,000 realized in the prior quarter. The increases to noninterest expense were partially offset by a \$1.2 million decline in professional services expense primarily driven by lower strategic project costs.

INCOME TAXES

The effective tax rate for the three months ended September 30, 2022 was 17.0%, compared to 16.7% for the three months ended June 30, 2022, as the prior quarter reflected the impact of discrete items related to the sale of DHFB.

BALANCE SHEET

At September 30, 2022, total assets were \$20.0 billion, an increase of \$288.4 million or approximately 5.8% (annualized) from June 30, 2022, and an increase of \$14.6 million or approximately 0.1% from September 30, 2021. Total assets increased from the prior quarter due to the increase in total loans held for investment (net of deferred fees and costs) of \$263.3 million driven by loan growth, as well as an increase in cash and cash equivalents of \$150.0 million due to deposit growth, partially offset by a decline in the investment securities portfolio of \$179.4 million primarily related to the impact of market interest rate increases on the market value of the available for sale securities portfolio.

At September 30, 2022, loans held for investment (net of deferred fees and costs) totaled \$13.9 billion, including \$12.1 million in PPP loans, an increase of \$263.3 million or 7.7% (annualized) from \$13.7 billion, including \$21.7 million in PPP loans, at June 30, 2022. Average loans held for investment (net of deferred fees and costs) totaled \$13.7 billion at September 30, 2022, an increase of \$207.9 million or 6.1% (annualized) from the prior quarter. Excluding the effects of the PPP(1), adjusted loans held for investment (net of deferred fees and costs) at September 30, 2022 increased \$272.9 million or 7.9% (annualized) from June 30, 2022 and adjusted average loans increased \$237.0 million or 7.0% (annualized) from the prior quarter. At September 30, 2022, loans held for investment (net of deferred fees and costs) increased \$779.1 million or 5.9% from September 30, 2021, and quarterly average loans increased \$281.8 million or 2.1% from the same period in the prior year. Excluding the effects of the PPP(1), adjusted loans held for investment (net of deferred fees and costs) at September 30, 2022 increased \$1.2 billion or 9.7% from the same period in the prior year, and adjusted quarterly average loans during the third quarter of 2022 increased \$954.8 million or 7.5% from the same period in the prior year.

At September 30, 2022, total deposits were \$16.5 billion, an increase of \$417.6 million or approximately 10.3% (annualized) from June 30, 2022. Average deposits at September 30, 2022 also increased from the prior quarter by \$297.2 million or 7.3% (annualized). Total deposits at September 30, 2022 decreased \$75.9 million or 0.5% from September 30, 2021, and quarterly average deposits at September 30, 2022 decreased \$229.9 million or 1.4% from the same period in the prior year. The decrease in total deposits from the prior year was primarily due to maturing high cost time deposits.

The following table shows the Company's capital ratios at the quarters ended:

	September 30, 2022	June 30, 2022	September 30, 2021
Common equity Tier 1 capital ratio (2)	9.96 %	9.96 %	10.37 %
Tier 1 capital ratio (2)	10.98 %	11.00 %	11.49 %
Total capital ratio (2)	13.80 %	13.86 %	13.78 %
Leverage ratio (Tier 1 capital to average assets) (2)	9.32 %	9.26 %	8.97 %
Common equity to total assets	10.60 %	11.32 %	12.68 %
Tangible common equity to tangible assets ⁽¹⁾	6.11 %	6.78 %	8.16 %

For the quarter ended September 30, 2022, the Company's common equity to total assets capital ratio and the tangible common equity to tangible assets capital ratio decreased from the prior quarter and prior year primarily due to the unrealized losses on the available for sale securities portfolio recorded in other comprehensive income due to market interest rate increases in the third quarter of 2022.

During the third quarter of 2022, the Company declared and paid a quarterly dividend on the outstanding shares of Series A Preferred Stock of \$171.88 per share (equivalent to \$0.43 per outstanding depositary share), consistent with the second quarter of 2022 and the third quarter of 2021. During the third quarter of 2022, the Company also declared and paid cash dividends of \$0.30 per common share, an increase of \$0.02 or approximately 7.1% from the second quarter of 2022 and the third quarter of 2021.

NON-GAAP FINANCIAL MEASURES

In reporting the results as of and for the periods ended September 30, 2022, the Company has provided supplemental performance measures on a tax-equivalent, tangible, operating, adjusted or pre-tax pre-provision basis. These non-GAAP financial measures are a supplement to GAAP, which is used to prepare the Company's financial statements, and should not be considered in isolation or as a substitute for comparable measures calculated in accordance with GAAP. In addition, the Company's non-GAAP financial measures may not be comparable to non-GAAP financial measures of other companies. The Company uses the non-GAAP financial measures discussed herein in its analysis of the Company's performance. The Company's management believes that these non-GAAP financial measures provide additional understanding of ongoing operations, enhance comparability of results of operations with prior periods and show the effects of significant gains and charges in the periods presented without the impact of items or events that may obscure trends in the Company's underlying performance. For a reconciliation of these measures to their most directly comparable GAAP measures and additional information about these non-GAAP financial measures, see "Alternative Performance Measures (non-GAAP)" in the tables within the section "Key Financial Results."

- These are non-GAAP financial measures. Net interest income (FTE) and total adjusted revenue (FTE), which are used in computing net interest margin (FTE), efficiency ratio (FTE) and adjusted operating efficiency ratio (FTE), provide valuable additional insight into the net interest margin and the efficiency ratio by adjusting for differences in tax treatment of interest income sources. The entire FTE adjustment is attributable to interest income on earning assets, which is used in computing yield on earning assets. Interest expense and the related cost of interest-bearing liabilities and
- cost of funds ratios are not affected by the FTE components.

 These are non-GAAP financial measures. Tangible assets and tangible common equity are used in the calculation of certain profitability, capital, and per share ratios. The Company believes tangible assets, tangible common equity and the related ratios are meaningful measures of capital adequacy because they provide a meaningful base for period-to-period and company-to-company comparisons, which the Company believes will assist investors in assessing the capital of the Company and its ability to absorb potential losses.

 These are non-GAAP financial measures. The Company believes that ROTCE is a meaningful supplement to GAAP financial measures. The Company believes that ROTCE is a meaningful supplement to GAAP financial measures and useful to investors because it measures the performance of a business consistently across time without regard to whether components of the business were acquired or developed internally.
- These are non-GAAP financial measures. Adjusted operating measures exclude the losses related to balance sheet repositioning (principally composed of losses on debt extinguishment), gains or losses on sale of securities, gain on the sale of DHFB, as well as branch closing and facility consolidation costs (principally composed of real estate, leases and other assets write downs, as well as severance associated with branch closing and corporate expense reduction initiatives). The Company believes these non-GAAP adjusted measures provide investors with important information about the continuing economic results of the organization's operations. Prior periods reflect adjustments for previously announced branch closing and corporate expense reduction initiatives.
- All ratios at September 30, 2022 are estimates and subject to change pending the Company's filing of its FR Y9-C. All other periods are presented as filed.

 These balances reflect the impact of the CARES Act and the joint guidance issued by the five federal bank regulatory agencies and the Conference of State Bank Supervisors on March 22, 2020, as
- subsequently revised on April 7, 2020, which provides relief for TDR designations and also provides guidance on past due reporting for modified loans.

 The adjusted operating efficiency ratio (FTE) excludes the amortization of intangible assets, gains or losses on sale of securities, gain on the sale of DHFB, losses related to balance sheet repositioning (principally composed of losses on debt extinguishment), as well as branch closing and facility consolidation costs. This measure is similar to the measure utilized by the Company when analyzing corporate performance and is also similar to the measure utilized for incentive compensation. The Company believes this adjusted measure provides investors with important information about the combined economic results of the organization's operations. Prior periods reflect adjustments for previously announced branch closing and corporate expense reduction
- These are non-GAAP financial measures. Pre-tax pre-provision adjusted earnings excludes the provision for credit losses, which can fluctuate significantly from period-to-period under the CECL methodology, income tax expense, losses related to balance sheet repositioning (principally composed of losses on debt extinguishment), gains or losses on sale of securities, gain on the sale of DHFB, as well as branch closing and facility consolidation costs. The Company believes this adjusted measure provides investors with important information about the combined economic results of the organization's operations. Prior periods reflect adjustments for previously announced branch closing and corporate expense reduction initiatives.
- These are non-GAAP financial measures. PPP adjustment impact excludes the unforgiven portion of PPP loans. The Company believes loans held for investment (net of deferred fees and costs), excluding PPP is useful to investors as it provides more clarity on the Company's organic growth. The Company also believes that the related non-GAAP financial measures of past due loans still accruing interest as a percentage of total loans held for investment (net of deferred fees and costs), excluding PPP, are useful to investors as loans originated under the PPP carry a Small Business Administration ("SBA") guarantee. The Company believes that the ALLL as a percentage of loans held for investment (net of deferred fees and costs), excluding PPP, is useful to investors because of the size of the Company's PPP originations and the impact of the embedded credit enhancement provided by the SBA guarantee.

 These are non-GAAP financial measures. The Company believes excluding PPP accretion interest income and fees from operating earnings is useful to investors as it provides more clarity on the

Q3 Macroeconomic Forecast

Moody's September 2022 Baseline Forecast:

- US GDP expected to increase 1.6% in 2022 and 1.4% in 2023. The US unemployment rate expected to average around 3.7% in the fourth quarter of 2022 and 3.9% in 2023.
- Virginia's unemployment rate averages 3.0% over the 2-year forecast.

Q3 ACL Considerations

- The baseline forecast was adjusted for the probability of worse-than baseline economic performance over the forecast period resulting in a weighted forecast scenario that increased Virginia's average unemployment rate to ~5.4% over the 2-year forecast period.
- Additional qualitative factors were applied for tailend COVID-19 sensitive portfolios and other factors deemed appropriate.
- The reasonable and supportable forecast period is 2 years; followed by reversion to the historical loss average over 2 years; consistent with CECL adoption.

The Company has provided supplemental performance measures on a tax-equivalent, tangible, operating, adjusted, or pre-tax pre-provision basis. These non-GAAP financial measures are a supplement to GAAP, which is used to prepare the Company's financial statements, and should not be considered in isolation or as a substitute for comparable measures calculated in accordance with GAAP. In addition, the Company's non-GAAP financial measures may not be comparable to non-GAAP financial measures of other companies. The Company uses the non-GAAP financial measures discussed herein in its analysis of the Company's performance. The Company's management believes that these non-GAAP financial measures provide additional understanding of ongoing operations, enhance comparability of results of operations with prior periods and show the effects of significant gains and charges in the periods presented without the impact of items or events that may obscure trends in the Company's underlying performance.

Adjusted operating measures exclude the gains or losses on sale of securities and gain on the sale of DHFB. The Company believes these non-GAAP adjusted measures provide investors with important information about the continuing economic results of the Company's operations. Net interest income (FTE) and total adjusted revenue (FTE), which are used in computing net interest margin (FTE), efficiency ratio (FTE) and adjusted operating efficiency ratio (FTE) respectively, provide valuable additional insight into the net interest margin and the efficiency ratio by adjusting for differences in tax treatment of interest income on earning assets, which is used in computing yield on earning assets, which is used in computing yield one earning assets, which is used in computing yield one earning assets, which is used in computing yield one earning assets, which is used in computing yield one one earning assets, which is used in computing yield one on earning assets, which is used in computing yield one on earning assets, which is used in computing yield one on earning assets, which is used in computing yield one on earning assets, which is used in computing yield one on earning assets, which is used in computing yield one on earning assets, which is used in computing yield one one earning assets, which is used in computing yield one one earning assets, which is used in the yield y

Net interest income (FTE) and total adjusted revenue (FTE), which are used in computing net interest margin (FTE), efficiency ratio (FTE) and adjusted operating efficiency ratio (FTE), respectively, provide valuable additional insight into the net interest margin and the efficiency ratio by adjusting for differences in tax treatment of interest income sources. The entire FTE adjustment is attributable to interest income on earning assets, which is used in computing yield on earning assets of interest-bearing liabilities and cost of funds ratios are not affected by the FTE components.

Tangible assets and tangible common equity are used in the calculation of certain profitability, capital, and per share ratios. The Company believes tangible assets, tangible common equity and the related ratios are meaningful measures of capital adequacy because they provide a meaningful base for period-to-period and company-to-company comparisons, which the Company believes will assist investors in assessing the capital of the Company and its ability to absorb potential losses.

TANGIBLE ASSETS, TANGIBLE COMMON EQUITY, AND LEVERAGE RATIO

~

Tangible assets and tangible common equity are used in the calculation of certain profitability, capital, and per share ratios. The Company believes tangible assets, snajble common equity and the related ratios are meaningful measures of capital adequacy because they provide a meaningful base for period-to-period and company-to-company companisons, which the Company believes will assist investors in assessing the capital of the Company and its ability to absorb potential losses. The Company believes that ROTCE is a meaningful supplement to GAAP financial measures and useful to investors because it measures the performance of a business consistently across time without regard to whether components of the business were acquired or developed internally. Adjusted operating measures exclude gains or losses on sale of securities and the gain on the sale of DHFB. The Company believes these non-GAAP adjusted measures provide investors with important information about the continuing economic results of the Company's operations.

Pre-tax pre-provision adjusted earnings excludes the provision for credit losses, which can fluctuate significantly from period-to-period under the CECL methodology, income tax expense, gains or losses on sale of securities and the gain on the sale of DHFB. The Company believes this adjusted measure provides investors with important information about the combined economic results of the Company's operations. The Company believes excluding PPP accretion interest income and fees from operating earnings is useful to investors as it provides more clarity on the Company's non-PPP related income.

PPP adjustment impact excludes the unforgiven portion of PPP loans. The Company believes loans held for investment (net of deferred fees and costs), excluding PPP is useful to investors as it provides more clarity on the Company's organic growth. The Company also believes that the related non-GAAP financial measures of past due loans still accruing interest as a percentage of total loans held for investment (net of deferred fees and costs), excluding PPP, are useful to investors as loans originated under the PPP carry an SBA guarantee. The Company believes that the ALLL as a percentage of loans held for investment (net of deferred fees and costs), excluding PPP, is useful to investors because of the size of the Company's PPP originations and the impact of the embedded credit enhancement provided by the SBA guarantee.
